SUMMARY

Software engineer and technical product builder with 5+ years across web platforms, enterprise workflows, and AI/data products. Hands-on building React/Next.js and TypeScript applications, reusable UI systems, real-time dashboards, API integrations, and AI-driven workflow tools. Combines engineering execution with clear communication, Agile delivery, and experience coordinating global and vendor teams. Fluent English (C2); native Spanish.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, HTML5, CSS3, responsive UI, reusable components, data visualization, WebSockets

Engineering: REST APIs, Node.js, Supabase, Zod, Git/GitHub, Docker, GCP, Python/FastAPI, Redis, PostgreSQL, MongoDB

Quality & Delivery: Type checking, linting, automated testing, code review, QA, Agile/Scrum, performance-aware UI design, vendor collaboration

AI & Workflows: AI-driven software, LLM workflows, real-time intelligence, workflow automation, reporting, content operations

EXPERIENCE

Founder & Product Lead (Hands-on Engineering) | Parallax | Buenos Aires Dec 2025 - Present

- Built Mission Control, a Next.js/React/TypeScript workflow cockpit for launch intelligence, source confidence, operational deltas, and briefing workflows, structured as reusable frontend modules.
- Designed typed client libraries and business logic supporting mock, live, and hybrid data modes; implemented Zod validation, explicit API failure states, and resilient WebSocket reconnection and fallback behavior.
- Built Globalview, a TypeScript financial-intelligence terminal with 20+ configurable widgets, modular layouts, real-time feeds, interactive charts, Supabase-backed state, and mobile-friendly workflows.
- Integrated AI-generated summaries and Andromeda intelligence into user-facing dashboards; shipped rapid product iterations using AI-assisted development, type checking, linting, and build validation.

Senior Associate, Product Operations - Identity Platforms | PwC | Buenos Aires Oct 2022 - Nov 2025

- Coordinated delivery across product, engineering, security, compliance, and vendor teams for enterprise identity workflows spanning Okta, SailPoint, ForgeRock, and provisioning systems.
- Translated business and technical requirements into workflow definitions, backlog items, release plans, documentation, and acceptance criteria; supported QA and release readiness.
- Built automated reporting pipelines and Tableau/Power Query dashboards tracking adoption, SLAs, incidents, and system health.

Product Manager | Magnetar | Buenos Aires Feb 2022 - Aug 2022

- Led a 0-to-1 fintech MVP from discovery through launch, turning founder strategy and user feedback into application workflows, prioritized requirements, and iterative releases.
- Partnered with design and engineering on prototyping, sprint planning, QA, and delivery decisions in a startup environment.

Content Engineer | R/GA | Buenos Aires Jul 2021 - Feb 2022

- Implemented custom HTML/CSS and digital-asset releases for global healthcare clients; collaborated with design, engineering, QA, and client stakeholders to resolve launch blockers and maintain delivery quality.

Site Manager | Accenture | Buenos Aires Sep 2019 - Jul 2021

- Managed configuration, publishing, QA, and releases for 40+ corporate websites on a global web platform; served as technical contact for distributed stakeholders.

CERTIFICATIONS & EDUCATION

Certifications:

Google Cloud Generative AI Leader (2026)

Scrum Foundation Professional (2024)

Agile with Atlassian Jira (2024)

Education:

Escuela Da Vinci - Web Design & Development (2018-2019)

Universidad de Palermo - Agile Methodologies (2019-2020)
